**Toxins** make fat harder for the body to burn. By helping the body to rid the fat of toxins you get many long term results that help with weight reduction and fat loss. **Detoxifying Seaweed Body Wraps** enables the body to burn fat more easily by unlocking fluids and toxins trapped in the tissues, and stimulate lymphatic flow to eliminate released toxins through the kidney and bladder. This will help to not only remove the existing body fat but it will prevent it from ever being deposited.
